

ROSHAN KRISHNAN THIRIKKOTT

SENIOR SOFTWARE ENGINEER

40 HIDCOTE RD, CAMPBELLTOWN, NSW - 2560

☎ (+61) 044-913-1707 | ✉ roshankrishnan7@gmail.com | 📄 github.com/ad-astra-semper | 🔗 linkedin.com/in/roshankrishnanthirikkott/

Summary

Senior Software Engineer with **14+ years of experience** driving technical direction, full-stack engineering, and DevOps strategies for enterprise applications. Proven track record designing high-volume, mission-critical systems across .NET, Blazor, and Angular ecosystems, while establishing **modern cloud infrastructure workflows** using Azure, Terraform, and Pulumi. Recognized as a cross-functional **Subject Matter Expert (SME)** who multiplies team velocity by building highly reusable platform templates and optimizing development lifecycles (e.g., cutting pipeline latency via Testcontainers). Heavily involved in early-stage **design sessions and technical discussions**, contributing to team-wide AI integration best practices while tackling complex, ambiguous challenges by engineering pragmatic, scalable solutions.

Work Experience

AGL Energy Ltd.

Melbourne, Australia

SENIOR SOFTWARE ENGINEER

Jun. 2021 - Present

- Involved in the **design and development** of the framework for a highly responsive real-time application dashboard using Blazor Server and C#, architecting a custom circuit-state management and client-side caching to handle heavy concurrent data payloads; slashed client-to-server data roundtrips while ensuring a seamless, desktop-like user experience
- Overhauled the integration testing suite by implementing Testcontainers** for .NET and Docker, replacing legacy, flaky environment dependencies
- Heavily involved in **setting up and optimizing Azure Pipelines**, successfully integrating Testcontainers to run automated integration tests, which cut build verification times from 1 hour (often timing out) down to just a few minutes
- Expanded and enhanced a foundational, grid-based .NET and Angular data store** platform; leveraged this extensible engine as a standardized template across multiple enterprise projects, **slashing initial setup time** for all subsequent admin data stores.
- Involved in team-wide brainstorming and design initiatives to define **AI implementation guardrails** and best practices, aligning emerging AI capabilities with our existing .NET and cloud infrastructure workflows.
- Involved in the end-to-end design and development of a greenfield .NET and Blazor application from inception, engineering it to handle high-volume telemetry data streams and complex moving components while maintaining scalable, responsive UI validations.
- Served as the **Subject Matter Expert (SME)** for several core applications, providing technical guidance to team members, managing application health, and onboarding developers onto the ecosystem.

City Facilities Management

Melbourne, Australia

ANALYST PROGRAMMER / FULL STACK DEVELOPER

Aug. 2019 - Jun. 2021

- Designed and Developed energy management SaaS product deployed in Azure
- Development of **highly scalable event-driven microservices** based product built using .NET Core and Angular employing Domain Driven Development practices
- Extensively used Azure cloud products and services including App Services, Functions, Service Bus, B2C, Storage, DB, Key Vault, Pipelines and DevOps
- Development of middleware that connects Azure Service Bus and Snowflake data warehouse to exchange application and data warehouse events
- Creation and configuration of Azure build pipelines
- Worked within an agile scrum team, involving heavily in backlog prioritisation, business as well as technical grooming

CitySoft Consulting Group Pty Ltd

Melbourne, Australia

FULL STACK DEVELOPER

Aug. 2017 - Aug. 2019

- Lead developer for multiple projects with responsibilities including **requirement analysis, solution design, DB design**, development and maintenance
- Design and development of timesheet management application distributed as SaaS and hosted in AWS. Build the CI/CD pipeline using Jenkins
- Oversaw the complete overhaul** of front-end JS framework from AngularJS to Angular 7
- Design and development of order processing application using .NET core and Angular 7
- Developed .NET core and .NET Web APIs that Integrates with Sage 300 ERP Systems using .NET libraries
- Develop and maintain company websites (AU, UK and Asia) - Using Drupal

TATA Consultancy Services

Kochi, India

SYSTEMS ENGINEER

Mar. 2012 - Feb. 2016

- As **offshore support and development team lead** for BaNCS Treasury software, involved in gathering requirements from clients and designing solutions; managing a team of 4 developers and L2 support members
- Additional responsibility of backup DBA** taken up, which involves: Taking regular backup of servers and database dumps | Setup environments and databases for various teams involved in the project | Perform Data Recovery drill at regular intervals
- Part of Phase II of ALM Dataware-housing requirement as part of the project for a client to create a dataware house of required data which are used for reporting purpose- both regulatory and non-regulatory

Technical Skills

Backend & core: C#, .NET 8 / .NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ

Frontend: Blazor Server|WASM, Angular, React

Cloud (Azure): AKS, Azure App Services, Azure Functions (Serverless), Azure SQL, Cosmos DB, Service Bus, Key Vault, Redis, App Config

Infrastructure as Code (IaC): Terraform, Pulumi

DevOps & Tools: Azure DevOps, Github Actions, Docker, Kubernetes, xUnit

Education

Monash University

MASTER OF INFORMATION TECHNOLOGY

Melbourne, Australia

Feb. 2016 - Dec. 2017

Kannur University

BACHELOR OF TECHNOLOGY - COMPUTER SCIENCE AND ENGINEERING

Kerala, India

Aug. 2007 - Jun. 2011
